Dear members,

The doctor makes every effort to reply to questions in a reasonable time frame. Due to his numerous commitments, including research, there's sometimes a delay in posting responses. Every effort is made to reply within two to three weeks, however there may be times during which that period may be longer.

Please don't wait for a reply on the forum before seeking medical attention.

Visit http://www.imbcr.org/contact_us.htm for contact information for the IMBCR.
